

Special Projects

Work Center for Young Children with Disabilities This is a project designed to provide vocational skills training to young people with disabilities, prepare them for entrepreneurship and help them become productive members of society

Project 955 Project 955 is about prevention, early detection and management of hearing impairments among children 0-6 years old. It is called 955 because by the year 2009, the project would have assisted 5,000 children aged 0-5 in 50 barangays. The project is in partnership with Better Hearing Philippines

Little Doctors and Nurses Organizing public school children for disability prevention and early detection using the child-to-child approach
